Technology used in the online real estate:

We have developed this project using the below technology:

- HTML: Page layout has been designed in HTML.
- CSS: CSS has been used for all the designing part.
- JAVASCRIPT: All the validation task and animations have been displayed by JavaScript.

OBJECTIVE:

- ❖ The objective of the project is to develop a system that automates the processes and activates of a online real estate.
- ❖ The purpose is to design a system using which one can Perform all operations related to who want to buy flats, Sights.

Town ships: This provides the information about which where are the buildings, flats are there. And you can buy Those flats which present there.

Land for sale: this provides the information about where are the sights are there to buy.

FEATURES OF THE ONLINE REAL ESTATE:

- Online real estate provides the searching facilities based on various factors such as PG, flats, bookings, commercial, offices.
- Shows the information of the cost
- It is easy to buy a house or land by this website it helps to save the time.
